

# Dimitri Walters

226-978-3473 | me@dimi.io | dimi.io

## Summary

I am a software developer with a sharp mind and passion for learning. My experience as a software developer includes developing a company internal-system with the Java Spring framework, developing a social-networking site using PHP, developing web mobile/tablet apps with PhoneGap, developing a WordPress theme, and using a variety of other technologies such as Angular, Rails, Heroku, jQuery, AJAX, SASS, Bootstrap, Facebook, Google Maps, and Google Calendar.

## Experience

### Web Application Developer

Nuvation

January 2014 – April 2014

- Developed an internal system that contains functionality to search for employees, find projects, find skill sets, keep track of bills, and many other essential features
- Technologies used: Java, Spring, Hibernate, JSPX, JUnit, MySQL, JavaScript, jQuery, AJAX

Recommendation:

*"Dimitri has a keen eye for design and learns quickly. His ability to adapt allowed to quickly learn many new technologies during his time at Nuvation. He met his deadlines on time and always delivered polished and well crafted code with little defects."*

~Supervisor

### Front-end Web Developer – dreamhomefinder.scotiabank.com

Rich Media

May 2013 – August 2013

- Developed a web application and HTML5 mobile and tablet apps using PhoneGap for the Android, iOS, and BlackBerry platforms
- This app allows users to search for homes listed for sale and add them to a saved list
- Technologies used: JavaScript, AJAX, PHP, PhoneGap, Google Maps

Recommendation:

*"Dimitri was an asset to the team during his co-op term at Rich Media. He produced reliable software and valuable insight while contributing to the development of mobile web applications."*

~Lead Developer

### WordPress Developer – uwafsa.ca

University of Waterloo - Accounting & Finance Student Association

May 2013 – June 2013

- Developed a custom built WordPress theme for a University of Waterloo society
- Technologies used: PHP, JavaScript, jQuery, AJAX, Google Calendar

## Back-End Web Developer – my10ants.site88.net (development version)

My10ants, freelance project

February 2013 – April 2013

- Developed a social-networking site using PHP and MySQL for landlords and tenants to write reviews and scope each other out before making crucial decisions
- Technologies used: PHP, MySQL, JavaScript, jQuery, Bootstrap, Facebook API

Recommendations:

*“Dimitri was very professional and provided great results for the work my team had assigned for him. Dimitri was very easy to communicate with and overcame any obstacles throughout the term of the project. Would highly recommend Dimitri for development of an MVP. Fantastic work!”*

~Client

*“...Dimitri updated his progress and communicated regularly with the team and our client. He was clearly detail-oriented, asking many insightful questions and identifying potential problems in advance. He learned new technologies quickly to adapt to the client's needs. I'd love to work with Dimitri again on future projects.”*

~Team Member
